

Robert J. Andrzejewski

Dr. Robert J. Andrzejewski, a native Delawarean, has served the public school system in the State of Delaware for 31 years as a teacher, assistant principal, principal, assistant superintendent and superintendent.

Dr. Andrzejewski has done extensive work in the formative and summative assessment arenas. In his role as Superintendent of the Red Clay Consolidated School District, he worked with school leadership teams to implement a formative assessment system that supported teachers' efforts to measure the academic growth of individual students over time in the critical skill areas of reading and math. He also designed and implemented a Data-Driven Leadership Training Academy that provided professional development opportunities to assist school leadership teams in more effectively analyzing curriculum-embedded assessment data.

Dr. Andrzejewski also served on the State of Delaware Student Assessment Task Force, a committee charged with recommending a new assessment system for the State. His assessment experience and expertise in Red Clay and at the State level has been used to support teachers as they work to implement best practices in all curricular areas.

Dr. Andrzejewski's experience in designing and implementing structural school improvement options has been extensive. His work in this area included the design and implementation of new academic programs within schools as well as the opening of new schools with focused career pathways. He also implemented a 21st Century Leadership Academy that provided professional development opportunities for teachers and administrators focused on integrating technology into the curriculum. The Academy also provided forums for school leadership teams to share best practices in this area. This collaborative effort to provide 21st Century learning environments contributed significantly to the district's commitment of providing a world-class educational experience that meets the needs of today's students.
