

**Student Score = 20**

1. What do the data in *Figure 1* indicate about the range in beak depth in the finch population in 1976? (Note: Use numerical data in your response.)

The data in Figure 1 indicates that in 1976 the range of beak depth in the finch population was 5.8 mm to 13.8 mm. Most of the finches had a beak depth somewhere in the middle with very few having a small or large beak depth.

**Student Response**

The data in Figure 1 indicates that in 1976 the range of beak depth in the finch population was 5.8 mm to 13.8 mm. Most of the finches had a beak depth somewhere in the middle with very few having a small or large beak depth.
