

Federal Programs Information

FEDERAL PROGRAMS INFORMATION

Nearly all of the federal education funds received by the Department are used to enhance the impact of state and local education program funding. There are a variety of federal grants which appear to fall into two major categories: those grants of long, sustained duration which represent federal interest in addressing systemic issues, and those of shorter duration which represent federal initiatives to address special national concerns. Each federal grant has a specified use of funds which may range from enhancing services to special classifications of students, to improving teacher quality, to improving vocational education, to assisting students in the transition from school to work, or to implementing special federal initiatives designed to address specific educational shortcomings. Federal funds may affect curriculum, instruction, or the educational environment.

During the last decade the Delaware Department of Education implemented a subgranting process, which requires subrecipients of federal education funds to coordinate the use of funds, including State and local, in a unified plan to address identified areas of educational need for each district. This unification of the planning process has helped to assure optimum use of all educational funds, including federal, at the local level.

In addition to federal education funds, the State receives food service funding to support child nutrition programs in schools, child and adult care food programs, and summer nutrition programs across the State. These funds help ensure the quality and quantity of nutrition offered to individuals at risk of not receiving sufficient basic nourishment to maintain good health and benefit from their education experience.

The following pages provide the reader with a detailed listing for each of the major federal programs through which the State receives funds – in most instances the titles identify the use of funds.
