Flexible ways of using Interim items for instructional purposes.

(Revised November, 2021)

The interims can now be used in more flexible ways for instructional purposes, whether it is one item at a time, showing the items on a white board and having the students discuss the different strategies to solve the problem, or select a few items from the Interim Assessment Item Portal (IAIP). Only registered educators who have a ClassLink account can access the interims in either standard administration or via the secure IAIP.

Before jumping to the IAIP website, we strongly recommend that you see this video about the purpose of the interims and read the Interim Assessments Overview. This document describes the interim assessments (IABs, ICAs, and Focused IABs), including their purpose, use, and varieties. For each grade and subject, this document provides a list of all interim assessments available for the 2021-22 school year. For the blueprints of each of the assessments, refer to the last opage of this document.

INTERIM ASSESSMENTS AT A GLANCE

Interim Comprehensive Assessments
Assess the full range of targets, similar to the summative.
Examples:
• *Grade 3 ELA*
• *Grade 3 Math*

Interim Assessment Blocks
Assess 3–8 targets in Math or ELA/literacy.
Examples:
• *Grade 3 ELA, Reading Literary Texts*
• *Grade 3 Math, Operations and Algebraic Thinking*

Focused Interim Assessment Blocks
Assess 1–3 targets in Math or ELA/literacy.
Examples:
• *Grade 3 ELA, Text Analysis (Literary)*
• *Grade 3 Math: Multiply and Divide Within 100*

Standardized vs. Non-standardized Administrations

Interims can be administered in both standardized and non-standardized ways in the classroom.

a) In a traditional, standardized administration, educators assign each student an interim assessment to take individually, and educators can use students' results as part of the formative assessment process.

b) Educators can also use interim assessments for non-standardized administrations by displaying items to a class using a service provider's item viewer application (AVA) for students to answer on paper, in small groups, or as a class discussion.

c) Also in a non-standardized administration, educators can conduct instructional activities, such as eliciting evidence from students using white boards, incorporating peer feedback while administering brief writes or performance tasks, or using an item to set up students working in small groups.

FAQs:

Q1: How do I View the Interim Items prior to consideration with my students?

A1: To help with decision on which interims (IABs, ICAs, or Focused IABs) to use, read the Interim Assessments Overview and then view use AVA platform to see the items in the interested interims. These are already all packaged in a set of about 15 items.

Q2: Can a teacher select a few questions from the IAB or does the teacher have to give students the entire IAB at one time?

A2: Due to the flexibility of using the interims, educators can select a few questions from the IAB using the IAIP portal (Tools for Teacher website) or administer the interims as standardized administration where all the students results will flow into the Centralized Reporting System (CRS) on the DeSSA portal.

Q3: Can a teacher print the questions they would like the students to answer, administer the paper version to students, then collect all papers associated with the questions before students leave the class?

A3: Yes, use IAIP portal to select the items you want to present to students and print them in PDF. *Remember about the security of these items that must stay within the school environment. See Test security training for more details about security of administering assessments.*

Q4: Can a teacher project the question(s) for students to answer on paper?

A4: Yes, Using the AVA platform you can project the items on a whiteboard and have students answer them either individually or a in small group for instructional purposes.

Q5: Can students complete a few questions online in an IAB and not other questions and still submit for scoring?

A5: Yes, Student can just answer a few questions as part of an online administration but the results will not be reliable as the results will take into account all items (whether answered or not).

Q6: How can the parent and Public see sample Interims items?

A6: The general Public and parents can only view the sample items and practice tests and not the Interims items or IAIP as these are secure and meant for educators as part of their instructional purpose and support. (Best to use Chrome, Safari or Edge to view math items which contain symbols and equations).

Q7: Where can I find resources for Formative Assessment processes for use in my classroom?

A7: The Formative Assessment Process is a deliberate process used by teachers and students during instruction that provides actionable feedback that is used to adjust ongoing teaching and

learning strategies to improve students' attainment of curricular learning targets/goals. See the short video to understand the Formative Assessment Process.

Balanced Assessment System Ecosystem

The Balanced Assessment System consists of an ecosystem with Interim assessments, resources to support teachers before, during, and after administering interims (Tools for Teachers) and information about the summative assessments for grades 3-8 in ELA/L and Mathematics. We will provide information about the **Tools for Teachers** supports which includes the Content Explorer, Interim Assessment Item Portal (IAIP), SmART Annotated Tool for Writing, and Connection Playlists. Blueprints of ELA/L and Math assessments are readily available as well.

Instructional Supports

- Our new website features teacher-created lessons and activities to enhance instruction, save time in lesson planning, and boost student learning.

- Formative assessment resources and accessibility instructional strategies that are effective across different grades and content areas.

- Links to sample questions, interim assessment items and additional tools to dive deeper into sample test questions.

VISIT: TOOLS FOR TEACHERS →

Interim Assessments

- Optional tests administered throughout the year to help teachers monitor student progress and be able to choose the right assessment at the right time.

- Provides educators with actionable data about student knowledge and abilities to help teachers target instruction to meet students' individual learning needs.

- Items include all the accessibility resources available in the summative assessment to help provide accurate results for students.

HANDOUT: INTERIM ASSESSMENTS OVERVIEW →

Summative Assessments

- Administered at end of the school year to determine students' progress toward college and career readiness.

- Computer-adaptive testing, performance tasks and a broad array of accessibility features allow students to better demonstrate what they know and can do.

- Multiple reporting options enable educators to get the information they need, when they need it, and in their preferred format.

VISIT: THE SUMMATIVE ASSESSMENT PAGE →

Tools for Teachers.

Tools for Teachers is an easy-to-use website that features lessons and activities created by educators to save time, enhance instruction, and prepare students for college or a career. Tools for Teachers focuses on the formative process, which helps teachers identify where students are in their learning, where they are going, and how they will get there. The website is accessible with all learners in mind that includes strategies that support diverse learners.

https://youtu.be/jJPAU1zOAp4
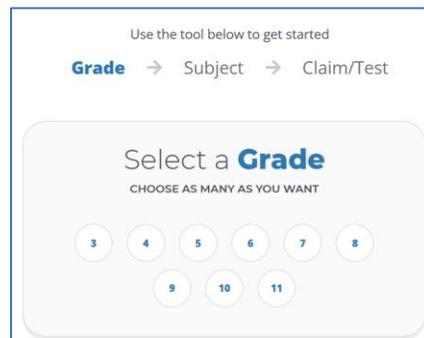

The following resources are available:

- Interim Connection Playlists (associated with IAB)
- Instructional Resources
- Formative Strategies (classroom instruction)
- Accessibility Strategies
- Professional Learning Resources
- Interim Assessment Item Portal (IAIP)

It also connects to the Content Explorer, (how items are connected to the academic standards), Connections Playlists, SmART Annotated Tool, and Interim Assessment Items Portal (IAIP) from the main page. See next page for more detail on each of these resources.

Content Explorer and its Resources

This site is full of resources and primarily show you how items are connected to academic standards, Claims and Targets. There is the transparency of how items are developed and coded so educators can use the resources with full confidence of their alignment to the standards.

Educators can also understand the Test Development and Design of the Assessments (Summatives and Interims). This includes the blueprints, scoring Guidelines, Content Specifications and Rubrics for each of ELA and Mathematics, and Content Specifications.

Connections Playlists

With Interim Connections Playlists, you can match student performance on Smarter Balanced Interim Assessment Blocks (IABs) to specific topics and find related instructional resources to use in the classroom the very same day. They can also be used as part of an a) observational tool, b) to support student goal setting, or c) provide guidance on various differentiation needs.

Sample Connection Playlist for Math Grade 4 Geometry

SmART Annotated Response Tool

The Smarter Annotated Response Tool project was initiated to provide an interactive approach to illustrate how educators score student responses to performance task items on assessments. SmART was designed to be more efficient and clearer for educators to use than the previously released documents.

What Do Writing Tasks Measure?

Writing tasks challenge students to demonstrate critical thinking skills. In each task, students examine sources on a topic and write a response based on a specific purpose described in state academic standards.

Writing tasks help educators measure students' ability to write effectively for each purpose, using source material as appropriate, and to demonstrate command of the conventions of standard English.

Educators can use SmART for a variety of purposes, including but not limited to:

- Gaining insight into grade-level expectations for each score point of each trait scored for ELA full writes,
- Learning about specific qualities of high-scoring responses to help inform classroom writing instruction,
- Creating professional development materials to use with teachers who might be unfamiliar with or desire more experience using criteria-based rubrics to score a variety of student writing,
- Creating materials to share with students to illustrate strong examples of student writing as well as how less successful work could be revised to improve the quality, and
- Sharing with parents who wish to see examples of student work to gain a better understanding of what their students are expected to demonstrate as they engage in the performance task portion of the ELA assessment.

Interim Assessment Item Portal (IAIP)

https://interimitems.smartertoolsforteachers.org/BrowseItems

Before jumping into the IAP, we recommend that you watch this video https://youtu.be/lm-thuZCp4c

to fully understand the Smarter Balanced Interim Assessments and how they can support teaching and learning throughout the year.
