

DCAS Proficiency Chart

In addition to the data from the Academic Performance Framework (Appendix 2.1a1), the following chart shows DCAS proficiency levels at each grade level across several years. Read across the rows to compare 2014 students to those students in the same grade level from a previous year. Read down a colored diagonal to follow the "same" group of students over several years. The bold and italicized numbers represent when PCA was above the state average.
