Re: Thomas A. Edison Charter School  
Charter Renewal

To Whom It May Concern:

I am a fifteen-year staff member of the Thomas A. Edison Charter School (TECS) family who is strongly in support of its charter renewal. I started working at Edison as a temporary employee and was offered a permanent position the following year. I couldn't have accepted a more rewarding position than to support educating students at TECS.

I enjoy working for a school that has staff members who are dedicated to ensure that all students get the education that they deserve. In addition to educating students at TECS, we have an awesome leader, Principal EL, who understands the environment from which our students are a part of and is able to communicate in a manner in which our students can easily relate. Principal EL, as well as his staff, have the compassion, sensitivity, and commitment to make sure that the students feel safe and receive the education and care that they deserve in the TECS environment.

Many of our students feel that Thomas A. Edison Charter School is their home away from home. Edison provides a warm place of learning where the students have a feeling of acceptance because they are embraced by a school with the motto of being "dedicated to educating and elevating every student, every day, to attend the best schools and colleges."

As educators, we realize and have accepted the responsibility to educate our students at Edison even though the community we serve may have some risk in its environment. The commitment that we have to our school, students, and community is a demonstration of the love we have for our school. Therefore, as a concerned educator, I would greatly appreciate it if the charter renewal is approved so that we can continue educating the students of Thomas A. Edison Charter School. Thank you,

Sincerely,

Carolyn A. Meadows
