Public Comment: The youth of Delaware deserve to be and will be well prepared for present unlimited possibilities and future successes under the Direction of Dr. Brett Taylor and Educational Guidance of the new Charter school Delaware Stem Academy. As a retired educator, I totally support the mission, purpose and intent of the Delaware Stem Academy. It's OPENING this fall is very timely and meaningful for the state of Delaware as a whole and especially the children served. Respectfully submitted.

Public Comment: There is a need for another public high school with a focus on STEM in Delaware. The Charter School of Wilmington has a long wait list, and many students who want to attend cannot. As a parent, I see a real need for another charter school with this focus. I heartily endorse approval for the charter for the Delaware STEM Academy. The local high schools are not meeting the needs of many students who are interested in STEM education. There is a shortage of classes and teachers in the local high schools in these subject areas. Please approve the charter for Delaware STEM Academy. Thank you.
