**Public Comment:** My name is Marisol Cabrera I am parent of Academia Antonina Alonso I am also the Secretary of the PTA, We are very excited about the potential move for our school. Our students currently do not have any outdoor space(other then an old parking lot) they must also share gym, library and cafeteria spaces with the other schools I believe this move will allow our children to grow academically. In our current building it has been a struggle for our school to get the support it needs it seems like the other schools get priority over ours. It is very difficult for our school to organize events for the children because we are given a small time frame after school that we can be in the building more then once we have had to rent space in other schools. With the benefits of the new space our children we be able to do so much more and start true expeditionary learning. This will make for happier students and staff.

**Public Comment:** This would be such a great opportunity for this school including staff and students. Over the two years being in the current building there has been many issues with safety especially where they have space for recess time. Also issues with lunches and times our children arent getting fed with sufficient time since they share with two other schools. I feel in order for students to grow and be safe they need this move. They need time outside and for the parents to feel they are safe when they are, currently they have to cross busy streets and play in a gated cemented small area surrounded by not the greatest area of the city. Also many events held in current building have to be rushed and cut short due to extra cost if they go over a few minutes, and nothing can go pass 8:00pm on any night. We need a space like this to be a true expeditionary learning school, both for student and staff.
