Public Comment: I am writing to support Delaware Design-Lab High School because it is a great school for my grandson Drake Keith and for so many other children. Last week Drake was so excited that his Tech Teacher invited him to speak on the student panel at the Design Aware Delaware Conference! Drake shared his version of entrepreneurship and his learning curve of supply & demand but most importantly, how to utilize a passion & create a small business! At 70, I have no computer skills, so I am extremely impressed and proud of Drake's ability to make an income by using computer technology taught by the school's knowledgeable and passionate Staff, namely Ms. McKenica and all his Special Ed, IEP support Educators that believe in "hands on" abilities and not just a grade as a measurement of knowledge. Thank you for this wonderful opportunity given by Delaware Design-Lab HS!

Sincerely,
Luci Cappelle Deputy
