# AGEC Meeting July 29, 2020 

Delaware

## AGENDA

1. Welcome \& Introductions
2. Disproportionality and the Alternate Assessment
a. Why Focus on Disproportionality
b. Definition
c. State Level Data on Disproportionality
d. Risk Ratio
e. State Guidance Document

## Why Focus on Disproportionality 1\% Cap

Delaware
Department * Education

## Why Focus on Disproportionality?

## ESSA Requirements

The Every Student Succeeds Act (ESSA) of 2015 requires states to apply for a waiver prior to the testing window if they think they will go over the 1\% participation rate cap for students with the most significant cognitive disabilities taking an AA-AAAS (34 CFR 200.6(c)(2)).

## Delaware's Waiver Extension Results

1\% Cap Decision: Received, February 18, 2020

- DE did not assess 95\% of all Students with Disabilities in all three subject areas
- DE did not assess 95\% of all students on the Science Assessment
- DE did not demonstrate that it reduced the rates of students taking the alternate assessment
- DE did not demonstrate substantial progress in achieving the plan and timeline

## Delaware's Actions 2019-2020

- LEAs were required to complete 95\% Participation Plans
- Creation of the Alternate Assessment Participation Decision Making Workshop
- Adoption of Delaware's Definition of Students with Significant Cognitive Disabilities
- Revised the State Guidelines
- Created a Companion Guide to the State Guidelines

Alternate Assessment Training 2019-20

## Why Focus on Disproportionality?

## ESSA Requirements

Part of a state's waiver application is verifying and addressing disproportionality in the identification of students with the most significant cognitive disabilities.

Specifically, the state must provide evidence that it has verified that each LEA
(1) followed the state's guidelines for participation in the AA-AAAS; and
(2) will address any disproportionality in the percentage of students in any subgroup under section 1111(c)(2)(A), (B), or (D) of the Act taking an AA-AAAS (34 CFR 200.6(d)), consistent with section 612(a)(16) (C) of the IDEA.

## Delaware's Waiver Extension Results

1\% Cap Decision: Received, February 18, 2020

- DE did not verify that LEAs will address disproportionality.

## Delaware's Next Steps

1\% Cap Decision: Received, February 18, 2020

- Examine subgroup participation trends across the LEAs
- Examine state level data on disproportionality.

## Why Focus on Disproportionality?

## ESSA Requirements

These student groups include seven racial and ethnic groups

- White
- Black or African American
- Hispanic
- Native American
- Alaska Native, Asian
- Pacific Islander
- Multiracial
- socio-economic status
- English learners.

The state must also provide a plan and timeline with clear, actionable steps and milestones for how the state will address any disproportionality in the percentage of students taking an AA-AAAS.

## (2) (4) 6

Disproportionality exists when there are atypical differences in the proportions of participants from a student group who take the alternate assessment in comparison to the general assessment.

It is an inquiry into whether certain groups are over- or under-identified as having a significant cognitive disability.

## District Level Data

Step 1: Determine an Approach for Detecting Atypical Values

Delaware's Approach
Multi-Year Analyses: Longitudinal Trends

- Use can Reduce issues related to small sample sizes
- Allows the examination of magnitude of change

Our Actions:

- Focus on 7 districts in Level 2 Status
- Compared district subgroup participation rates over the past 5 years
- 2015-2019
- ELA, Math and Science

## Longitudinal Trends

## Longitudinal Trends

Capital ELA Assessment
2015-2019 Trend Analysis by Subgroup

## Longitudinal Trends

Christina ELA Assessment
2015-2019 Trend Analysis by Subgroup

## Longitudinal Trends

Colonial ELA Assessments
2015-2019 Trend Analysis by Subgroup

Note: Two Different Assessments 2015-2017
Note: Two Different Assessments 2015-2
DCAS-ALT1 and 2018-2019 DeSSA ALT

## Longitudinal Trends

Cape Henlopen ELA Assessment
2015-2019 Trend Analysis by Subgroup

Note: Two Different Assessments 2015-2017 DCAS-ALT1
and 2018-2019 DeSSA ALT

## Longitudinal Trends

Laurel ELA Assessments
2015-2019 Trend Analysis by Subgroup

Note: Two Dlfferent Assessments 2015-2017 DCAS-ALT1 and 2018-2019 DeSSA ALT

## Longitudinal Trends

Step 2: Determine Focus Areas:
Following Examination of Participation Patterns

- African-Americans
- Low-Income
- Males

## State Level Data

## State Level Data

Assumption is that there should be similar proportions of students with significant cognitive disabilities from across race/ethnicity categories, FRL status and EL status compared to the general population.

## Exploring Disproportionality

Step 1: Establish participation rate for each Focal Group

- Use of multi-year data
- Addresses the issue of small n-size challenges

## Step 2: Calculate the Test Statistic

- Difference in proportions - quantify the difference between alternate participation minus the "expected proportion".
- Risk Ratio - relative risk.

## Exploring Disproportionality

Step 3: Determine if the difference is meaningful

- Determine whether the difference in proportions or risk ratio is meaningful
- Compute a confidence interval - determine if the test statistic is outside the interval for a desired level of confidence
- Assume a $95 \%$ confidence interval

## 2 <br> Exploring Disproportionality

Questions to consider

- Are there pronounced differences between the results in the current year compared to previous years?
- Are there distinct differences for one or more focal groups compared to results from other entities?
- Are the results consistent with available literature/research base?
- Are there contextual factors that should be taken into account?

## Caution

Differences in student group participation rates based on small $n$-sizes may appear as large differences in proportions or relative risk ratios.

## State Level ELA Data

| ELA | 2017 |  |  | 2018 |  |  | 2019 |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
