Middle School Counselor

Special Education (not DCAS Alt; not reading and/or math 3-10)

High School Counselor

Gifted and Talented

* **High School Mathematics** educators will find their growth goals banded by content, rather than by grade or subject. Thus, educators and their evaluators will be able to elect goals that align to specific content, rather than to a course list, which will provide educators further discretion.

****School Psychologists’ and Visiting Teachers’** Growth Goals underwent significant revisions for the 2015-16 school year in collaboration with a committee of representatives from each educator group.
