

**Delaware Department of Education  
Curriculum Development Workgroup  
Regulation #502 Local Curriculum Alignment  
Clarification #8 Health Education Units  
March 2008**

**Health Education Curriculum Alignment Evidence**  
**Scoring Clarification - Form 2 Local Curriculum Alignment Scoring Rubric, Category III**

Districts using Category III evidence to satisfy Regulation 502 requirements in Health Education are required to submit **two (2)** units of Health instruction, along with the unit summative assessments and scoring rubrics for those two units at each grade cluster level for which they choose to use this Category, with one important caveat described below.

There is one caveat pertaining to the two units to be submitted from each grade cluster served by the school district (i.e., K-2, 3-5, 6-8, 9-12). Districts are required to submit the following unit as one of the two units to be submitted for that grade cluster:

- |              |                                                                                   |
|--------------|-----------------------------------------------------------------------------------|
| Grades K-2:  | One of the two submitted units must address Injury Prevention and Safety          |
| Grades 3-5:  | One of the two submitted units must address Alcohol, Tobacco and Drug Prevention  |
| Grades 6-8:  | One of the two submitted units must address HIV prevention                        |
| Grades 9-12: | One of the two submitted units must address Alcohol, Tobacco, and Drug Prevention |

This clarification is intended to support Delaware Administrative Code Title 14 (Education) §851 K to 12 Comprehensive Health Education Program.
